Subject:

Discontinuation of Hochiki Conventional SLV-AS3 Photo-Optical Detector

To whom it may concern

The SLV-AS3 Conventional Photo-Optical Detector approved to Australian standards (AS7240.7) by Activfire has ceased manufacturing and distribution into the Australian market due to component obsolescence.

The direct successor and replacement to the SLV-AS3 shall be the SOC-AS3. The SOC-AS3 is the first of Hochiki's latest generation range of conventional detector featuring enhanced performance and features making the SOC-AS3 smarter, and more immune to noise and false alarms than ever before.

The SOC-AS3 is approved to Australian Standards (AS7240. 7) and Activfire registered (afp-3190).

The SOC-AS3 is Activfire approved and listed as compatible for use with the following FDCIE:

- Kentec Electronics Ltd – Sigma CP (afp-2516)

Should you have any questions or would like to discuss the above further, please don't hesitate to contact the Hochiki Australia office on +61 (0) 2 9738 5566 or sales@hochikiaustralia.com
