

Fire Detection Holder

Description

The Famco Fire Detector Holder allows the installation of a fire detector within the ceiling space at variable heights. The holder enables easy inspection of the fire detector in the ceiling space from below the ceiling.

Available Options:

Three models are available to suit various ceiling space heights from 0.6m to 3.0m.

- **FP1200/*** Standard detector (* specify length of rod)
- **FP1200-LED/*** Detector complete with optional LED indicator on ceiling (* specify length of rod)
- **FP1** - Rod - 1m Adjustable from 0.6m to 1.15m
- **FP2** - Rod - 2m Adjustable from 1.0m to 1.95m
- **FP3** - Rod - 3m Adjustable from 2.0m to 3.0m
