

## SYNCRO AS FAN CONTROL MODULE SFCM

### Product Overview

The Incite SyncroAS fan control module (SFCM) has been designed to enable ease of interface to building services providing smoke control in an installation.

The SFCM manual controls will only operate when the enable keyswitch on the SyncroAS panel is in the enable position.

The SFCM contains 3 off 1668 control and status indicators, a general fire trip and isolate, and a lamp test button. The module connects to the SyncroAS panel by four wires, two for power and two for RS485 communications.

### Features

- Contains 3 x AS1668 controls
- Connects directly to SyncroAS RS485 data bus
- Auto - fan on & fan off modes
- Configurable through SyncroAS control panel or via a PC with Loop Explorer software
- Provides seamless fan control integration with SyncroAS panels
- Interfaces SyncroAS control panel to the duct detectors
