

## Evcco Conduit Adhesive

### Instructions for 35 ml Cartridge & Dispensing Gun

1. Twist cap off of cartridge to remove.
2. Unsnap and flip up the light grey cartridge holder in the front of the cartridge dispensing gun.
3. Slide the cartridge into the light grey frame. Line up the larger plunger on the gun with the larger side of the cartridge. (The cartridge is a 10 to 1 ratio). Snap back into place.
4. Pump the gun to dispense the Evcco Conduit Adhesive until both the black and white material comes out. Wipe the end of the cartridge clean.
5. Attach mixing nozzle to cartridge with a twisting motion to lock into place.
6. Pump the gun to dispense the Evcco Conduit Adhesive until the adhesive is a uniform grey, and then start applying the adhesive for bonding. Do not use the adhesive until it is a uniform grey colour.
7. To stop, push up on the silver lever under the plunger and pull the plunger all the way back.
8. Then remove the cartridge, remove the mixing nozzle, clean the end of the cartridge and twist the cap back on.
9. Storage: Store cartridges on their side in a cool location at 26° C (76° F) or cooler.
