The SSD 515-xS (Scattered Light Smoke Detector) is the smoke sensor for the accessory device SEC-REK 511 (full addressing) for the Aspirating Smoke Detector of the SEC-ASD and RAS product family. The SSD 515-xS operates according to the scattered light principle and is designed so that it optimally meets the specific requirements of smoke detection in association with an Aspirating Smoke Detector. The detector has alarm threshold tracking and is additionally available with various sensitivities. By choosing the appropriate detector sensitivity, application-specific detection properties of the Aspirating Smoke Detector are possible.

**Noise reduction housing**

**SEC-Insulation-housing**

The noise insulation housing is used as an  
accessory part for the aspirating smoke  
detector ASD 535 in areas where a low level  
of noise is required. If the ventilator noise  
from the aspirating smoke detector is found  
to be disruptive and changing the location of  
the evaluation unit is not possible, the  
aspirating smoke detector can be integrated  
into a noise insulation housing.
